

A PRACTICAL GUIDE TO CANINE AND FELINE NEUROLOGY

2E • New Edition • 9780813816722 • January 2009
 • HB Curtis W. Dewey **AUS\$245.00 NZ\$275.00**

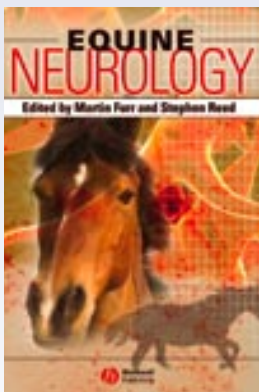

A Practical Guide to Canine and Feline Neurology provides students and clinicians with the tools necessary to understand and be clinically proficient with neurology cases faced in small animal practice. Highlights of the Second Edition include new coverage of breed predisposition, signalment and history, spinal disorders, and expanded coverage of pain management and diagnostic imaging. Designed as a succinct handbook, practitioners,

specialists, and students alike will enjoy the book's practical and clinically relevant approach.

EQUINE NEUROLOGY

9780813825199 • November 2007 • HB Furr and Reed
A\$130.00 NZ\$150.00

Equine neurology has become a central part of everyday equine practice. In this practical and comprehensive clinical reference, clinicians will find the up-to-date resources needed to effectively and confidently recognize, diagnose and treat neurologic diseases and disorders in equine patients. At the heart of the book are practical features, such as diagnostic algorithms, charts and tables, designed to aid in the clinical examination of the nervous system, differential diagnosis,

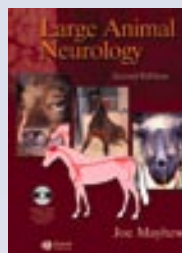

and appropriate methods of treatment. Detailed information on individual diseases and disorders is provided, including etiology, epidemiology, diagnostic methods, treatment, prognosis and prevention. A practical review of the basic anatomy and physiology of the nervous system also provides the essential framework for understanding and treating equine neurological problems.

LARGE ANIMAL NEUROLOGY

2E • New Edition • 9781405154932 • April 2009
 • HB Mayhew (NZ) **AU\$210.00 NZ\$235.00**

Long-awaited and considerably updated new edition of the classic text on large animal neurology. Written by one of the world's leading experts, the book reflects his considerable experience gained in America, Australia, New Zealand and Britain. This practical reference is a complete guide for all veterinarians in handling large animal neurologic cases. It is richly illustrated in full colour

throughout, with 200 colour photographs plus detailed line drawings. In addition a wide variety of diseases are brought to life in video clips on the accompanying DVDs. This invaluable video library provides examples of actions, movements, postures and syndromes, and helps to visualise the definitions of clinical signs described in the text.

FUNDAMENTALS OF VETERINARY CLINICAL NEUROLOGY

9780813828435 • August 2005 • HB Bagley
AUS\$220.00 NZ\$250.00

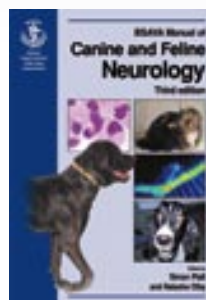

Fundamentals of Veterinary Clinical Neurology offers a broad overview of clinical neurology to provide students and clinicians with the unabridged knowledge they need to examine, diagnose, and treat disorders and diseases of the nervous system of small animals.

Written by a leading expert in the field of veterinary neurology, this text provides a clear and comprehensive guidance through the nervous system and its functions. Coverage includes basic concepts of nervous system functioning, clinical examination and problem identification associated with nervous system disease, neuroanatomical diagnosis, differential diagnosis (diseases of the nervous system), diagnostic testing, therapy, and clinical management of common and important neurologic conditions.

BSAVA MANUAL OF CANINE AND FELINE NEUROLOGY

3E • 9780905214740 • November 2004 • PB Platt & Olby
AUS\$235.00 NZ\$265.00

The success of the previous two editions of this popular manual demonstrates the importance of neurology as a speciality in small animal veterinary medicine. The newest edition of Canine & Feline Neurology has been completely revised and updated, yet maintains a problem-oriented approach. The manual offers complete coverage of neurological presentations including: clinical signs; lesion localization; pathophysiology; differential diagnosis; neurodiagnostic investigation and treatment.
