

ATLAS OF CLINICAL AVIAN HEMATOLOGY

• 9781405192484 • May 2009 • HB • Clark, Boardman, Raidal
AUD \$190.00 / NZD \$215.00

Atlas of Clinical Avian Hematology provides fundamental information and a practical guide to the hematological characteristics of birds. This Australian authored book initially describes how to collect and handle blood samples from birds to best preserve the quality of the blood. This rich resource aids interpretation of hematological data, covering both healthy and diseased

birds. The Atlas is illustrated throughout with colour photographs, and covers over 100 species of birds.

CLINICAL RADIOLOGY OF EXOTIC COMPANION MAMMALS

• 9780813810492 • October 2008 • HB
 • Capello, Lennox and Widmer **AUD \$245.00 / NZD \$275.00**

This heavily illustrated book provides a practical resource for veterinarians wishing to add exotics to their practice and a ready reference for those already including these species in their caseload. Clearly labeled normal images will aid anyone interested in comparative radiographic anatomy. Examples of radiographic abnormalities and a thorough techniques section will help overcome difficulties related to the smaller size of many exotic companion mammals.

AVIAN AND EXOTIC ANIMAL HEMATOLOGY AND CYTOLOGY

3E • 9780813818115 • January 2007 • HB
 • Campbell and Ellis **AUD \$270.00 / NZD \$305.00**

This best-selling revision builds on the avian foundation of Campbell's earlier work and has grown to include coverage of several other important exotic animal groups including small mammals, reptiles, fish, and amphibians. This is the must-have hematologic and cytologic reference for all veterinarians and researchers working with avian and exotic animals. Includes hundreds of full-colour images as well as case studies with colour plates to aid the reader.

SKIN DISEASES OF EXOTIC PETS

• 9780632059690 • May 2006 • PB • Paterson
AUD \$110.00 / NZD \$125.00

There is currently a lot of interest within veterinary medicine in both dermatology and exotics, yet, despite this interest, there is no single text available that focuses on both these key areas.

This book, for the first time, provides a practical guide to dermatological problems in birds, reptiles, fish and mammals. Divided into the four groups, each section has a chapter introducing the structure and function of the skin of each group, a chapter on

examination and diagnostic tests, and further chapters on species specific skin diseases and treatments.

Written in a quick reference format and including almost 200 colour photographs, this book is a handy resource for veterinary practitioners, veterinary students and veterinary dermatologists alike.

BSAVA MANUAL OF EXOTIC PETS

4E • 9780905214474 • January 2002 • PB
 • Meredith (Editor), Redrobe (Editor) • 312 pages
AUD \$180.00 / NZD \$205.00

The BSAVA Manual of Exotic Pets has been a tried and trusted friend over the years. There are now many more non-traditional pets and both owners and veterinary surgeons have higher expectations of clinical care for these species. The book includes information on many and varied exotic pets including sugar gliders and chinchillas, clinical anatomy and imaging, tables of fluid, nutritional and supportive

therapy, tables of normal blood/urine values. Fully illustrated throughout and with over 30 international experts this is the manual of choice of many vets.
