## Provet e-Practice Showcase

Provet e-Practice is a comprehensive and flexible website solution for all veterinarians, with a range of design options to suit any requirements or budget. The flexibility allows you to choose from a growing selection of templates, incorporate your own design, or work with the web design team to come up with the perfect look.

The dedicated Provet IT team not only builds websites for veterinary practices but can custom build websites for veterinarians with different needs, such as specialist or emergency centres or other businesses involved in the veterinary industry.

Here are some exciting examples of new e-practice websites recently launched by Provet IT.

### Great Western Animal Hospital

"We are very happy with the look of our website as it ties in with the colour scheme of our hospital, practice logo, and yellow pages advertisement, as well as reflecting the family values of our practice. Our customers enjoy being able to access us online and find lots of useful information and we even have some new clients who found us through searching the internet, confirming what a valuable asset it is to have a professional looking website."

Dr. Mila Kasby, part owner and senior veterinarian.

### AIRC (Animal Industries Resource Centre) – Crampton Consulting Group

"AIRC/CCG is extremely pleased with the look and feel of our new website. The team at Provet IT listened carefully to our needs and recognised that as a training provider, we needed a smart site which reflected the many courses and programs we offer. As our clients can range from the general public through to Practice Principals and CEOs, our website navigation had to be spot on – we feel Komala, Matt and the team have put together a site which absolutely does this for us. It gives us peace of mind that our professionalism, standards and educational resources are being maximised through our new site, www.provetlearning.com.au. Even our students have already commented that they can find things like exam results much quicker. We are very happy overall with the results."

Rosie Overfield, Sales and Marketing Coordinator, AIRC/Crampton Consulting.

## PROVET IT WEB SERVICES

PROVET E-PRACTICE WEBSITE SOLUTIONS

### INTRODUCTORY OFFER

Sign up for an e-Practice Basic Package using one of our default website templates and get a complete veterinary practice website for just \$880.

The Basic Package includes five standard pages to introduce your practice and keep your clients updated:

- Home Page
- About the Practice
- Meet Our Staff
- Contact Us
- Our Services

We provide you with seven design templates to choose from, each with a range of colour and layout options. Mix and match our provided colour options to complement your practice colours or branding. You have complete control over the text and photos on your website.

### Your e-Practice Basic Package includes:

- Web hosting
- Content Management System - update pages and upload images with ease
- A remote training session to help you get the most out of your website
- Provet IT's monthly Web Services e-newsletter including VetInfo updates, new features and handy tips for website owners

To take advantage of this offer, contact the IT Business services team on **02 9894 2066** or email [eppractice@provet.com.au](mailto:eppractice@provet.com.au)

\* Designs are limited to provided templates, colours and layout images and any modifications will incur hourly design costs. Home Page, About the Practice, Contact Us and Our Services include up to two images per page. Meet Our Staff includes a photo and profile of each staff member. Cost does not include domain registration, additional content, custom features, e-Practice Extras or Features, Business Mail or additional services.
