

KRUUSE

Urinary Catheters

A covetrus  Company

KRUUSE Urinary Catheters

KRUUSE offer a variety of both Cat and Dog Urinary Catheters which are innovative and available in easy to use solutions. Developed to minimise discomfort to your patients, whilst providing premium quality products and ensuring user-friendly features.

KRUUSE Hydrophilic Coated (HC) Urinary Catheters

A first in Veterinary Medicine, the KRUUSE HC catheter is coated in a hydrophilic coating which is water activated.

When the coating is activated in water, the result is a very smooth and viscous surface throughout the entire length of the catheter. This means less friction in the dog's urethra without the need for lubrication. Suitable for short term use only (no longer than 10 minutes).

Easy to use...

Open the pouch

Pour suitable water in the pouch

Fix it on a tile if desired.
Wait 30 sec

The catheter is ready for catheterization

Provet Code	Description	Pack Size
CATH D HC1	KRUUSE HC Urinary Catheter, 1.6mm x 50cm, 5FG x 20"	● Single
CATH D HC2	KRUUSE HC Urinary Catheter, 2.0mm x 50cm, 6FG X 20"	● Single
CATH D HC3	KRUUSE HC Urinary Catheter, 2.6mm x 50cm, 8FG X 20"	● Single
CATH D HC4	KRUUSE HC Urinary Catheter, 3.3mm x 50cm, 10FG X 20"	● Single

KRUUSE Non-Coated (NC) Urinary Catheters

Made from medical grade DEHP-free (phthalate free), the NC catheter is softer and more biocompatible than most urinary catheters.

Due to this, the NC catheters are less likely to cause damages to the mucous membranes in the urethra and bladder compared to the more rigid catheters. Suitable for medium length use (up to 3 days).

Provet Code	Description	Pack Size
CATH D NC1	KRUUSE NC Urinary Catheter, 1.6mm x 50cm, 5FG X 20"	● Single
CATH D NC2	KRUUSE NC Urinary Catheter, 2.0mm x 50cm 6FG X 20"	● Single
CATH D NC3	KRUUSE NC Urinary Catheter, 2.6mm x 50cm, 8FG X 20"	● Single
CATH D NC4	KRUUSE NC Urinary Catheter, 3.3mm x 50cm, 10FG X 20"	● Single

BUSTER Dog Urinary Catheters

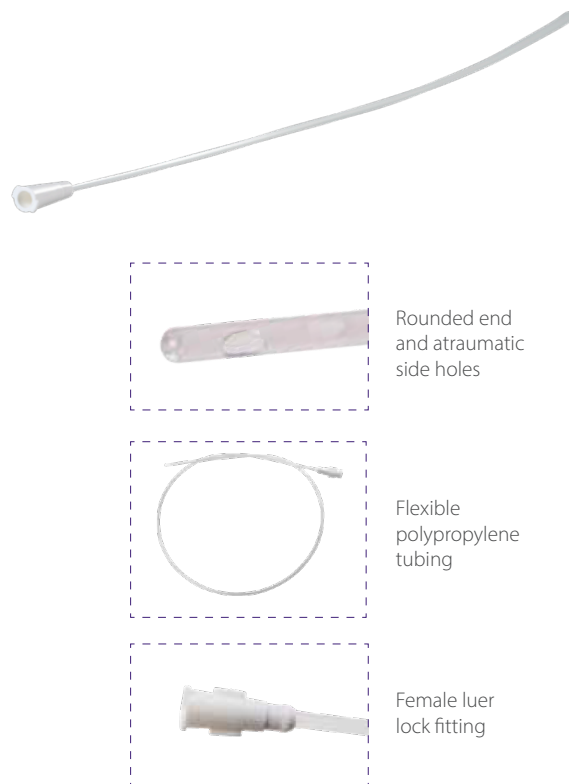

The BUSTER Dog Urinary Catheters consists of a variety of sizes to choose from to suit your patient.

Ideal for urine sample collection, check of passage in Urethra, bladder tension relief, bladder lavage and suitable for catheters to be left for drainage purposes during surgery or hospitalisation.

Features and benefits include:

- Female luer lock fitting
- Rigid yet flexible polypropylene catheter tubing for easy introduction
- Rounded end and atraumatic side holes to avoid tissue damage
- User-friendly blister packaging
- Each catheter is packaged and sold individually

Provet Code	Description	Pack Size
CATH D A0	BUSTER Sterile Dog Catheter 1.3mm, 4FG	Single
CATH D A1	BUSTER Sterile Dog Catheter 2mm, 6FG	Single
CATH D A2	BUSTER Sterile Dog Catheter 2.6mm, 8FG	Single
CATH D A3	BUSTER Sterile Dog Catheter 3.3mm, 10FG	Single

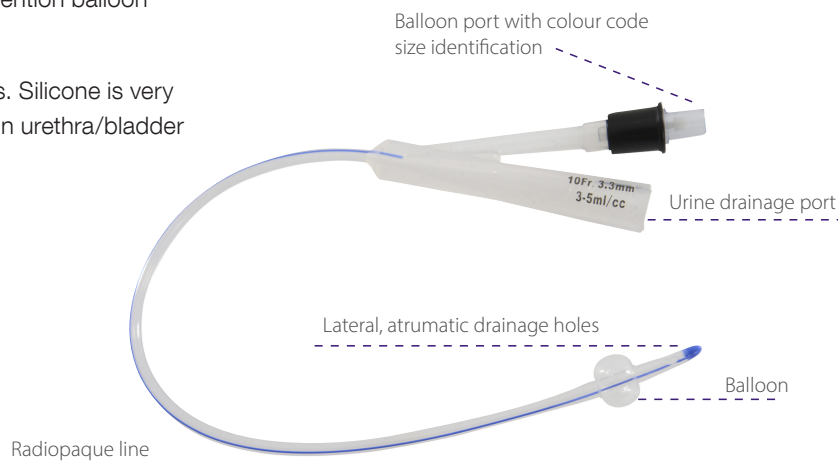

BUSTER Foley Catheters, Silicone

2-way catheter in 100% silicone with 3-5 cc (ml) retention balloon and stylet.

Catheter has rounded tip and atraumatic side holes. Silicone is very biocompatible, so is suitable for longer placement in urethra/bladder (up to 7 days).

Features and benefits include:

- Silicone catheter with high biocompatibility
- Suitable for long term placement
- Easy-removable steel wire
- Colour-coded cap for easy size recognition

Provet Code	Description	Pack Size
CATH KF12	KRUUSE Foley Catheter SIL 3.3mm x 30cm, 10FG x 12"	Single
CATH KF15	KRUUSE Foley Catheter SIL 3.3mm x 55cm, 10FG x 22"	Single
CATH KF62	KRUUSE Foley Catheter SIL 2mm x 30cm, 6FG x 12"	Single
CATH KF65	KRUUSE Foley Catheter SIL 2mm x 55cm, 6FG x 22"	Single
CATH KF82	KRUUSE Foley Catheter SIL 2.6mm x 30cm, 8FG x 12"	Single
CATH KF85	KRUUSE Foley Catheter SIL 2.6mm x 55cm, 8FG x 22"	Single

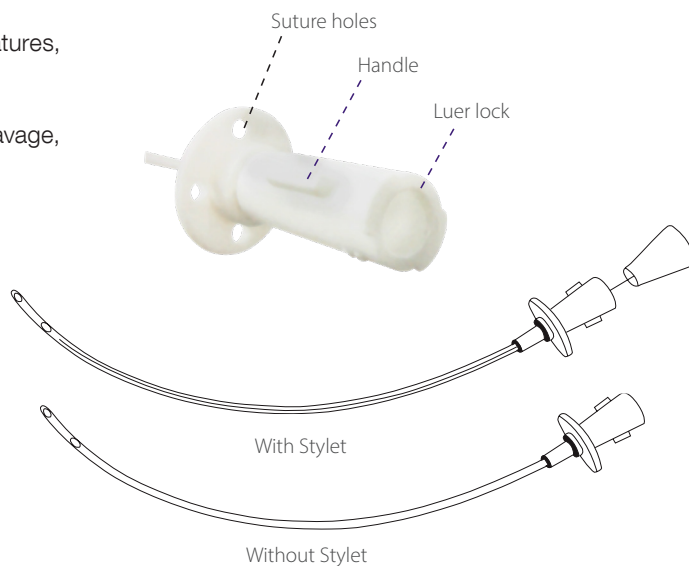

BUSTER Cat Urinary Catheters

The range of BUSTER Cat Urinary Catheters include a variety of features, materials and sizes to cover the different needs of the feline patient.

Ideal for urine sample collection, urine retention relief and bladder lavage, the catheter with stylet is softer than the catheter without stylet.

Features and benefits include:

- The luer lock adapter and the handle of the stylet are moulded for premium quality
- All catheters have rounded ends to avoid tissue damage
- Handle on luer adapter for better grip
- Suture holes on the baseplate allows easier suturing to the prepuce
- Made of top-quality Low-Density Polyethylene (LDPE)

Provet Code	Description	Pack Size
CATH C B1	BUSTER Sterile Cat Catheter with Stylet, 1.0 x 130mm, 3FG	Single
CATH C B2	BUSTER Sterile Cat Catheter with Stylet, 1.3 x 130 mm, 4FG	Single
CATH C B3	BUSTER Sterile Cat Catheter, without Stylet, 1.0 x 130mm, 3FG	Single
CATH C B4	BUSTER Sterile Cat Catheter, without Stylet, 1.3 x 130mm, 4FG	Single

BUSTER Barium Cat Catheter

The soft polyurethane catheter softens at body temperature and is less reactive compared to urine catheters made of other materials.

Features and benefits include:

- Made of soft polyurethane, making it ideal for hospitalized patients
- Suitable for medium term use *in situ* (up to 3 days)
- Suture holes in the baseplate allows suturing to the prepuce
- Female luer lock fitting
- X-Ray detectable which makes the catheter ideal for locating obstructions

Provet Code	Description	Pack Size
CATH C B7	BUSTER Barium Cat Urinary Catheter 1.0 x 130mm, 3FG	Single
CATH C B8	BUSTER Barium Cat Urinary Catheter 1.3 x 130mm, 4FG	Single

KRUUSE Urinary Collection

Kit4Cat

Hydrophobic Sand Urine Collection Kit

Kit4Cat is a revolutionary biodegradable hydrophobic sand that has a natural non-toxic urine repelling coating.

It allows veterinarians, technicians, nurses and cat owners to quickly and easily collect a cat's urine sample without resorting to invasive procedures.

The cat's urine will stay on top, allowing you to collect the urine using the pipette and vial that are included in every bag.

Examination

Feline

Period of Placement <i>in Situ</i>	Short and Medium duration (1-3 days)	Long duration (up to 7 days)
Typical Clinical Application	Securing urine passage. Typically used in FLUDD/FIC cats.	Hospitalised patients and surgery patients.
Features and Benefits	The catheter has two lateral side holes and a rounded, atraumatically closed end. Comes in different sizes and with or without stylet. Suturing holes in the baseplate allows suturing to the prepuce. Luer lock fitting: for easy connection to syringe.	BUSTER Barium catheter is made of polyurethane and contains Barium. The Barium makes it visible in x-ray. Polyurethane softens at body temperature, which increases the biocompatibility, hence suitable for longer term placement and hospitalized patients. The catheter has two lateral side holes and rounded, atraumatically closed end. Suturing holes in the baseplate allows suturing to the prepuce. Luer lock fitting: for easy connection to syringe or urine collection bag.
Catheter Types	BUSTER Cat Catheter, side holes	BUSTER Barium Cat Catheter

Canine

Period of Placement <i>in Situ</i>	Short duration (< 10 min)	Medium duration (10 min - 3 days)	Long duration (up to 7 days)
Typical Clinical Application	Urine sample collection, checking the passage of the urethra, bladder tension relief, bladder lavage.	Urine sample collection, checking the passage of the urethra, bladder tension relief, bladder lavage, drainage during hospitalisation.	Urine sample collection, bladder tension relief, bladder lavage, leave catheter for drainage purposes, during surgery or hospitalization.
Features and Benefits	No need for gel. Softer and more comfortable than other catheters. Colour-coded fitting and label for easy size recognition. Luer lock fitting allows easy connection to syringe.	BUSTER NC Urinary Catheter Softer and more comfortable catheter Colour-coded fitting and label for easy size recognition. Luer lock fitting allows easy connection to syringe or urine collection bag. BUSTER Male Dog Catheter More rigid catheter. Luer lock fitting allows easy connection to syringe or urine collection bag.	Very soft silicone catheter with high biocompatibility. Colour-coded cap and label for easy size recognition. Urine drainage port that fits urine collection bags.
